

CONE PENETRATION TEST PLANT

10T Stalwart Amphibious CPT Rig

Fugro has a number of different rigs designed for different site conditions. Available reactions range from 3 to 20T and can be modified for specific applications.

The rigs available are:

- Low bearing pressure track mounted rigs
- 6 wheel all wheel drive rigs
- Detach rigs
- Trailer mounted rigs

Fugro CPT rigs are equipped with state of the art data acquisition systems which are configured to operate with the full suite of Fugro cone penetrometers including:

- Friction cone
- Piezocone
- Seismic cone (single / double array)
- Electrical conductivity cone
- Thermal conductivity cone
- LIF cone
